

Emili 12'' Portable Water Tank 12000 l.

RUG
Expansion

Overview

Folding and transportable containment with a capacity of 12 000L with an aluminium structure, designed to store and exchange water between firefighter pumps.

Designed to set up a water supply point quickly and easily in those places where there is no access to hydrants, rivers or lakes.

In order to make it possible to efficiently empty the tank, Emil 12 is equipped with a drainage tube and has handles inside, which also facilitate the folding and further storage of the product.

It also features corner protectors to prevent the canvas from being caught by the hinges and straps at the top to protect the structure from loads.

Product data

- **CANVAS:**

Fabric = 100% PES/ 1100 dtex.
Fabric weight = 650 g/m²
Warp breaking strength = 2500N/ 5cm
Resistance to warp tearing = 250N
Weft breaking strength = 2300N/ 5cm
Resistance to weft tearing = 200N
Temperature resistance = -30/+70°C
Fire reaction = M2/B1 (optional flame-retardant)
Not suitable for drinking water (optional for drinking water).
Canvas Weight 20kg
Colour = Red (Other colour optional)

- **EMILI 12 WATER TANK MEASUREMENTS:**

Folded = 0,19 x 4 x 0,75 m
Extended = 4 x 4 x 0,75 m
Capacity = 12,000 litres (Other capacity optional)

- **ALUMINIUM FRAME:**

30 x 30 cm Quadratrohr und Kaliber 2 mm.
Gewicht = 30kg.

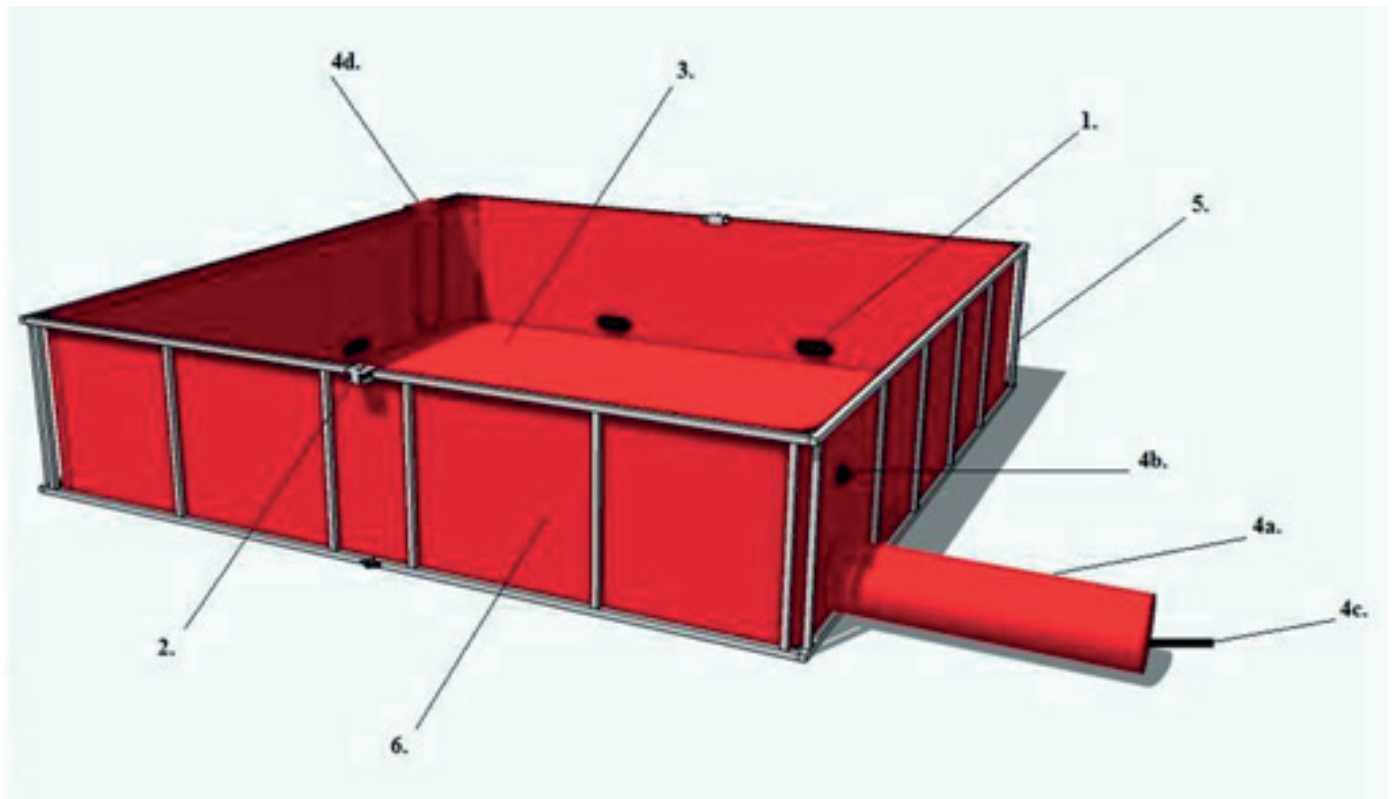

- **TOTAL WEIGHT**

50 kg.(in aluminium)
